

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](#) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextboks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Total Points: 30 out of 35

Please provide comments on any aspect of the instructional design of this textbook:

- Learning objectives clearly stated and summaries tie topics together well
- Everyday Connections helps to apply to real life experience
- Very searchable and easy to maneuver through: good to have click links back to topics, such as in the index and chapter summaries
- Great ancillary materials to use for student discussion, test preparation, etc.
- Chapter topics good, but sometimes sub-sections seem a bit choppy and confusing - better transition to tying together needed in some areas
- Some parts of the textbook get a bit more technical or advanced for an Intro book. For example, some aspects of Biopsychology and Psychological Disorders I would expect to see in a higher level course specific for a degree in psychology rather than those taking the course to meet a general education obligation
